

# Commercial Presentation Generator

**A standardised, spoken commercial pitch assembled per project. Locked methodology and approved Agency/Media content stay untouched; only “Why Country Now” is AI-generated, and nothing reaches the field until it's approved.**

Reps currently prepare each CEO/minister pitch manually, so methodology and Media facts drift between reps and projects. This build assembles the presentation from Locked Methodology, Agency/Media Master Content, one AI-generated Why Country Now section, and manual project inputs, then takes it through Draft → approval → a locked snapshot → Word/PDF export.

|                   |                    |                   |                        |
|-------------------|--------------------|-------------------|------------------------|
| STORIES (NOW)     | ROLES TOUCHED      | EST. EFFORT (NOW) | MAPPED FOR LATER       |
| <b>44 stories</b> | <b>user, admin</b> | <b>34 hours</b>   | <b>13 stories, \$5</b> |

## 0. Scope & sequencing

This build covers the brief's MVP scope (§27), plus three items pulled forward from §31 that turned out to be quick: Spanish/French language plumbing and a recent-interviews convenience list. Everything else in §5 stays deferred for one of three reasons: it's a bigger piece of engineering, the brief wants it kept manual or off-screen on purpose, or it's blocked on something (a Mockup Content Architecture) that doesn't exist yet.

**What's new here vs. every other module:**

Only one of the six blocks (Why Country Now) calls Claude — the rest is retrieval and template substitution. It's also the first module that fetches-or-generates from two other modules (Editorial Brief, Interview Letter) instead of researching from scratch, and the first place an approved document has to survive a later content edit without changing (US-160).

**After launch:**

Editing Agency/Media/Methodology/Language content — and adding Spanish/French copy — is ordinary admin work once this ships, no engineering needed. Engineering comes back only for a new content type, a third language, deeper Meeting Prep integration, or a configurable block structure.

## 1. Roles

| ROLE  | ACCESS                                                                                                                                                 |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| user  | Creates presentations, generates/edits Why Country Now, fills manual inputs, submits for approval. Read-only on Locked Methodology and Master Content. |
| admin | Everything a user can do, plus approve any presentation (including their own) and full CRUD on all Master Content types.                               |

**Note: no separate Manager/Admin tier.**

The brief describes Manager/Admin as an approval role distinct from Admin's content control. This app only has admin/user everywhere else, with no segregation of duties in any module — so both map onto the existing admin role, same as how Country Intelligence handled its Director role.

## Key technical decisions

---

### **Fetch-or-generate is app logic, not a prompt instruction.**

The platform checks for an existing Editorial Brief / Interview Letter and generates via the existing routes if missing. Claude never gets asked to find or generate them itself.

### **One AI call, one output.**

Every block except Why Country Now is static content or manual input. Keeps cost and hallucination risk small.

### **Approval snapshot includes a Master Content fingerprint.**

At approval we save the rendered text plus the Master Content version used. A later edit shows “New Master Content Available” without touching the locked text.

## 2. User stories — summary (this build)

| ID                      | AREA              | STORY                                                     |
|-------------------------|-------------------|-----------------------------------------------------------|
| FOUNDATION              |                   |                                                           |
| US-128                  | ACCESS            | Gate the module behind a permission flag                  |
| US-129                  | DATA              | Store the four content types separately, each versioned   |
| US-130                  | DATA              | Store block content as SAY/ACTION entries, not plain text |
| ADMIN — MASTER CONTENT  |                   |                                                           |
| US-131                  | AGENCY            | Admin CRUD for Agency Profiles                            |
| US-132                  | MEDIA             | Admin CRUD for Media Profiles                             |
| US-133                  | MEDIA             | Media Market field on each Media Profile                  |
| US-134                  | METHODOLOGY       | Admin CRUD for Locked Methodology                         |

| <b>US-168</b>                                     | <b>ANALYTICS</b>      | Log every generation to the usage ledger               |

### 3. Story detail & acceptance criteria

---

#### FOUNDATION

##### US-128 ACCESS

###### Gate the module behind a permission flag

###### ACCEPTANCE CRITERIA

- Add `can\_access\_commercial\_presentations` flag on profiles/invitations
- Blocked in middleware and hidden from sidebar without it

##### US-129 DATA

###### Store the four content types separately, each versioned

###### ACCEPTANCE CRITERIA

- Agency, Media, Methodology, Commercial Language each get their own table + versions table
- Only admin can write to them
- Presentations reference content by ID, never by copying text

##### US-130 DATA

###### Store block content as SAY/ACTION entries, not plain text

###### ACCEPTANCE CRITERIA

- Each entry is `{type: say|action, text}`
- Why Country Now output is always one `say` entry
- Viewer and both exports read the same structure

#### ADMIN — MASTER CONTENT

##### US-131 AGENCY

###### Admin CRUD for Agency Profiles

###### ACCEPTANCE CRITERIA

- Seeded with The Report Company + Global FDI Reports
- Supports [AGENCY]/[COUNTRY]/[MEDIA] placeholders
- No regenerate button — never AI-written
- Can't delete an Agency still in use

##### US-132 MEDIA

###### Admin CRUD for Media Profiles

###### ACCEPTANCE CRITERIA

- Fields: positioning, audience, reach, distribution, SAY/ACTION
- Seeded with placeholder outlets (USA Today, WELT, Newsweek, etc.)
- Missing Media Market blocks presentation creation

### US-133 MEDIA

#### Media Market field on each Media Profile

##### ACCEPTANCE CRITERIA

- Required, set once by admin
- Read automatically everywhere Media Market is needed

### US-134 METHODOLOGY

#### Admin CRUD for Locked Methodology

##### ACCEPTANCE CRITERIA

- Three blocks: Chit Chat & Seating, Choreography, Transition to Interview
- Read-only for normal users — enforced server-side, not just hidden

### US-135 LANGUAGE

#### Admin CRUD for Commercial Master Language

##### ACCEPTANCE CRITERIA

- One protected block, used in Block 5 on every project
- [MEDIA MARKET] placeholder substitution
- Versioned with rollback

### US-136 EXAMPLES

#### Admin manages the Reference Examples pool

##### ACCEPTANCE CRITERIA

- 10–20 examples, optionally tagged by project type
- Style-only — generation never treats them as facts

### US-137 HISTORY

#### Version history across all four content types

##### ACCEPTANCE CRITERIA

- Snapshot previous version on every save
- Rollback via the existing version-history UI
- Rolling back doesn't touch an already-approved presentation

## CREATING A PRESENTATION

### US-138 CREATE

#### Create a presentation from Agency + Media + Project

##### ACCEPTANCE CRITERIA

- Country comes from the Project, never asked again
- Language defaults to English

#### **US-139** RETRIEVE

##### **Pull in Master Content on creation**

###### ACCEPTANCE CRITERIA

- Shows Agency, Media, Locked Methodology immediately — no AI call
- Blocks creation if the selected Agency/Media has missing content

#### **US-140** FETCH-OR-GENERATE

##### **Fetch or generate the Editorial Brief**

###### ACCEPTANCE CRITERIA

- Retrieve if it exists, else generate + save via the existing Editorial Brief flow
- UI shows Retrieved vs Generated
- Failure shows a clear, retryable error

#### **US-141** FETCH-OR-GENERATE

##### **Fetch or generate the Interview Request Letter**

###### ACCEPTANCE CRITERIA

- Same retrieve-or-generate flow as US-140, via the existing Letter Generator
- A missing template doesn't block the whole presentation

#### **US-142** RETRIEVE

##### **Pull in Project Research + Reference Examples**

###### ACCEPTANCE CRITERIA

- Research passed in as fact
- Examples passed in as style-only

### MANUAL PROJECT INPUTS

#### **US-143** MANUAL

##### **Anchor Event, Date and Context fields**

###### ACCEPTANCE CRITERIA

- All optional
- Generation works with all three blank

#### **US-144** MANUAL

##### **People to Mention field for Block 2**

###### ACCEPTANCE CRITERIA

- Free text, manual only
- US-174's list can suggest names, nothing auto-inserts

#### US-145 MANUAL

##### Mockup variable fields for Block 5

###### ACCEPTANCE CRITERIA

- Main Interview, Investment Angle, Main Sectors required; Other is optional
- Inserted as-is — no AI rewrite

#### US-174 CONVENIENCE

##### Suggest names from recently completed interviews

###### ACCEPTANCE CRITERIA

- Simple query over the Project's completed interviews, most recent first
- Click to add — nothing auto-inserted

### WHY COUNTRY NOW

#### US-146 GENERATE

##### Generate the Why Country Now section

###### ACCEPTANCE CRITERIA

- Full source order: user input → Brief → Letter → Research → Examples → optional fresh research
- Output = spoken version + New External Facts (or “None”)
- Streamed on claude-sonnet-4-6, token-gated before the call

#### US-147 GENERATE

##### Self-determine the angle when no Anchor Event is given

###### ACCEPTANCE CRITERIA

- Model picks the strongest angle on its own
- Never invents a fake hook

#### US-148 RESEARCH

##### Check for Recent Developments toggle

###### ACCEPTANCE CRITERIA

- Opt-in web search per generation, never automatic
- Existing project research stays primary

#### US-149 REVIEW

##### Flag new external facts for review

###### ACCEPTANCE CRITERIA

- Shown as its own section, or “None”
- No separate accept/reject step needed

#### **US-150** GUARDRAIL

##### **Bake in the writing-rules guardrails**

###### ACCEPTANCE CRITERIA

- Length, tone, banned AI phrases fixed in the system prompt
- Not admin-editable

#### **US-151** ITERATE

##### **Regenerate / Generate Alternative while in Draft**

###### ACCEPTANCE CRITERIA

- No approval needed at this stage
- Each run billed and logged like the first

#### **US-152** ITERATE

##### **Edit text or return to a previous version**

###### ACCEPTANCE CRITERIA

- Direct edits cost nothing
- Exactly one current version at any time

#### **US-153** HISTORY

##### **Keep a basic generation history**

###### ACCEPTANCE CRITERIA

- Flat list, not full diffing
- Visible inside the Draft view

### ASSEMBLY & SAY/ACTION

#### **US-154** ASSEMBLY

##### **Assemble the six blocks in fixed order**

###### ACCEPTANCE CRITERIA

- Matches each block's content type from the brief
- No AI call besides Why Country Now

#### **US-155** LOGIC

##### **Template logic for Block 2's anchor line**

###### ACCEPTANCE CRITERIA

- WITH/WITHOUT Anchor Event variants, plain substitution
- Never phrased by Claude

#### **US-156** UI

##### **Distinguish SAY vs ACTION visually**

###### ACCEPTANCE CRITERIA

- Genuinely different styling, not just a label
- Preserved in both exports

#### LANGUAGE SUPPORT (PULLED FORWARD FROM §5)

#### **US-169** LANGUAGE

##### **Add Spanish as a selectable language**

###### ACCEPTANCE CRITERIA

- Per-language content variant, falls back to English if untranslated
- One extra instruction line in the Why Country Now prompt
- Writing the actual Spanish copy is admin work, not part of this estimate

#### **US-170** LANGUAGE

##### **Add French using the same mechanism**

###### ACCEPTANCE CRITERIA

- Reuses US-169's schema and prompt logic — no new plumbing

#### APPROVAL & SNAPSHOT

#### **US-157** WORKFLOW

##### **Submit for approval**

###### ACCEPTANCE CRITERIA

- Only once required fields + a Why Now version exist
- Iteration controls lock while pending

#### **US-158** WORKFLOW

##### **Approve / Edit & Approve / Return for Changes**

###### ACCEPTANCE CRITERIA

- Admin can approve their own work
- Return for Changes preserves everything already entered

#### **US-159** SNAPSHOT

##### **Lock and snapshot on approval**

###### ACCEPTANCE CRITERIA

- Stores the fully rendered text, not references
- Records which Master Content version was used

#### **US-160** MASTER CONTENT

##### **Detect Master Content changes after approval**

###### ACCEPTANCE CRITERIA

- Compares snapshot version to current version
- Shows “New Master Content Available”, never auto-changes the approved text

#### **US-161** WORKFLOW

##### **Reopen for revision on updated Master Content**

###### ACCEPTANCE CRITERIA

- Old approved version stays live until the new one is approved

#### **US-162** HISTORY

##### **Basic audit history per presentation**

###### ACCEPTANCE CRITERIA

- Created/edited/approved by + date
- Not a full diff viewer

### EXPORT

#### **US-163** EXPORT

##### **Export to Word**

###### ACCEPTANCE CRITERIA

- Only available on Approved presentations
- SAY/ACTION visually distinguished

#### **US-164** EXPORT

##### **Export to PDF**

###### ACCEPTANCE CRITERIA

- Same data as Word, different format
- No fresh Claude call needed

### CROSS-CUTTING

#### **US-165** EDGE

##### **Block generation before it costs anything**

###### ACCEPTANCE CRITERIA

- Token check happens before the API call, not after
- Specific error messages, not a generic failure

#### **US-166** EDGE

##### **One presentation per project, reused for every meeting**

###### ACCEPTANCE CRITERIA

- No per-CEO selector anywhere
- Doesn't duplicate Meeting Prep's workflow

#### **US-167** GUARDRAIL

##### **Reference Examples stay style-only**

###### ACCEPTANCE CRITERIA

- Explicit instruction in the system prompt
- Omitted entirely when none are relevant

#### **US-168** ANALYTICS

##### **Log every generation to the usage ledger**

###### ACCEPTANCE CRITERIA

- New workflow value `commercial\_presentation\_why\_now`
- Regenerate logs its own row, doesn't overwrite

## 4. Effort estimate — this build

Hours assume AI-assisted development (Claude Code doing most of the scaffolding), not a from-scratch estimate.

| STORY                   | SCOPE                                                     | HOURS |
|-------------------------|-----------------------------------------------------------|-------|

| <b>US-166</b>                                    | One presentation per project, reused for every meeting | <b>0.5</b> |
| <b>US-167</b>                                    | Reference Examples stay style-only                     | <b>0.5</b> |
| <b>US-168</b>                                    | Log every generation to the usage ledger               | <b>0.5</b> |
| <b>Total — this build</b>                        |                                                        | <b>34</b>  |

## 5. Later — a menu, not a commitment

Real items from the brief, just not part of this build — either bigger engineering, deliberately kept manual/off-screen, or blocked on something that doesn't exist yet. IDs are reserved so nothing needs renumbering later.

| ID                                                              | AREA            | STORY                                                                                  |
|-----------------------------------------------------------------|-----------------|----------------------------------------------------------------------------------------|
| MEETING PREP INTEGRATION & PERSONALIZATION                      |                 |                                                                                        |
| US-171                                                          | INTEGRATION     | Closer connection with Commercial Meeting Preparation                                  |
| US-172                                                          | PERSONALIZATION | Optional CEO-specific additions without regenerating the core presentation             |
| US-173                                                          | AUTOMATION      | Automatic name-drop suggestions — kept manual on purpose (§16), not for effort reasons |
| MOCKUP INTELLIGENCE <span>BLOCKED ON MOCKUP ARCHITECTURE</span> |                 |                                                                                        |
| US-175                                                          | MOCKUP          | Connection with a future Mockup Content Architecture                                   |
| US-176                                                          | MOCKUP          | AI reads the mockup file and auto-adapts the Block 5 walkthrough                       |
| DELIVERY MODES <span>OUT OF SCOPE BY DESIGN</span>              |                 |                                                                                        |
| US-177                                                          | DELIVERY        | Live or tablet presentation mode — this is a rehearsal doc, not a screen tool          |
| US-178                                                          | DELIVERY        | Slide or graphic deck generation                                                       |
| COMMERCIAL COACHING & REHEARSAL                                 |                 |                                                                                        |
| US-179                                                          | COACHING        | Coaching based on the approved presentation, mirroring Sales Negotiation Coach         |
| US-180                                                          | COACHING        | Audio rehearsal capture                                                                |
| US-181                                                          | COACHING        | Compare actual delivery against the approved methodology                               |
| US-182                                                          | COACHING        | Flag recurring deviation from approved methodology                                     |
| GOVERNANCE & STRUCTURE                                          |                 |                                                                                        |
| US-183                                                          | GOVERNANCE      | Director-level / segregation-of-duties permissions                                     |
| US-185                                                          | STRUCTURE       | Admin-configurable block structure                                                     |

### Not a backlog item:

Auto-modifying Master Content from a project edit. §26 says the system must never do this. Not deferred — just never.

### Suggested pick-up order:

Meeting Prep integration (US-171/172) first. Coaching (US-179–182) once enough approved presentations exist to coach against. Mockup intelligence (US-175/176) and configurable structure (US-185) last — both need architecture that doesn't exist yet. Name-drop automation (US-173) and Director permissions (US-183) only if TRC decides it wants them.

## 6. What this build unlocks

---

1. **Every rep opens with TRC's strongest current argument.** Pulled from research that already exists, not memory.
2. **One approved script works in every market.** Locked Methodology never varies by country.
3. **Media facts stop drifting between reps.** One admin-owned Media Profile per outlet.
4. **Approval finally has one real document to sign off on.** A locked snapshot per project, not a verbal agreement.
5. **No new AI pipeline needed.** Reuses Editorial Brief and Letter generation as-is.

## 7. Open questions for TRC

---

1. **Reference Examples.** Who curates and refreshes the 10–20 examples?
2. **Media Profile content.** Do the six seeded outlets ship with real copy, or placeholders?
3. **Recent Developments cost cap.** Should this be capped per project?
4. **“Circumstances changed”.** Any guidance beyond “if in doubt, resubmit”?
